Professional Summary

Computer Science Engineering student with a strong foundation in Python, JavaScript, SQL, and web development. Passionate about software engineering, backend development, problem solving, and building practical software applications. Currently strengthening Data Structures C Algorithms, backend development fundamentals, and AI application development through personal projects.

Education

Qualification	Institution	Year	CGPA / Percentage
B.E. in Computer Science (IoT, Cyber Security and Blockchain)	Dayananda Sagar Academy of Technology and Management	Expected Graduation: 2027	8.45 CGPA
Class XII	MES PU College, Sirsi	2023	89.83%
Class X	Don Bosco High School, Sirsi	2021	94.56%

Technical Skills

Programming Languages: Python, JavaScript, SQL
Databases: MySQL , SQLLITE
Web Technologies: HTML5, CSS3, JavaScript
Tools s Platforms: Git, GitHub, VS Code
Core Computer Science Subjects: Data Structures and Algorithms , Database Management systems .

Projects

WishCraft – Birthday Page Generator

Tech : React, Vite, Supabase, Vercel

- Built a responsive web application that generates personalized birthday webpages with custom messages, images, themes, and background music.
- Integrated Supabase for persistent birthday-card data and image storage, with dynamic shareable birthday URLs.
- Deployed the application on Vercel and implemented SPA routing for reliable access to shared pages.

Mini ERP CRM — Full-Stack Web Application

Tech: React, TypeScript, Node.js, Express, PostgreSQL, Prisma, JWT

- Developed a role-based ERP/CRM system for managing **customers, products, inventory, and delivery challans**.
- Implemented **JWT authentication and role-based access control (RBAC)** for Admin, Sales, Warehouse, and Accounts users.
- Built REST APIs with **Prisma transactions** for stock movements and challan confirmation, with API documentation using Postman.

FocusFlow — Full-Stack Personal Productivity Platform

Tech: HTML, CSS, JavaScript, Python, FastAPI, SQLAlchemy, PostgreSQL, Supabase, Vercel, Render

- Developed a **responsive productivity platform** with task management, Pomodoro timer, productivity heatmap, progress tracking, task history, and quick notes.
- Built a **FastAPI REST backend with SQLAlchemy and PostgreSQL**, implementing CRUD APIs for cloud-backed task persistence through Supabase.
- Deployed the **frontend on Vercel and backend on Render**, enabling persistent task data across browser sessions and establishing the foundation for future authentication and cross-device synchronization.
